Workshop 08: Bootstrap Intro and Grid

Brainster Web Development Academy

Table of contents

Intro

For this week's workshop, you will need to work on two different exercises and implement the Bootstrap's grid system(containers, rows, columns) that you learned during the week,while working with git.
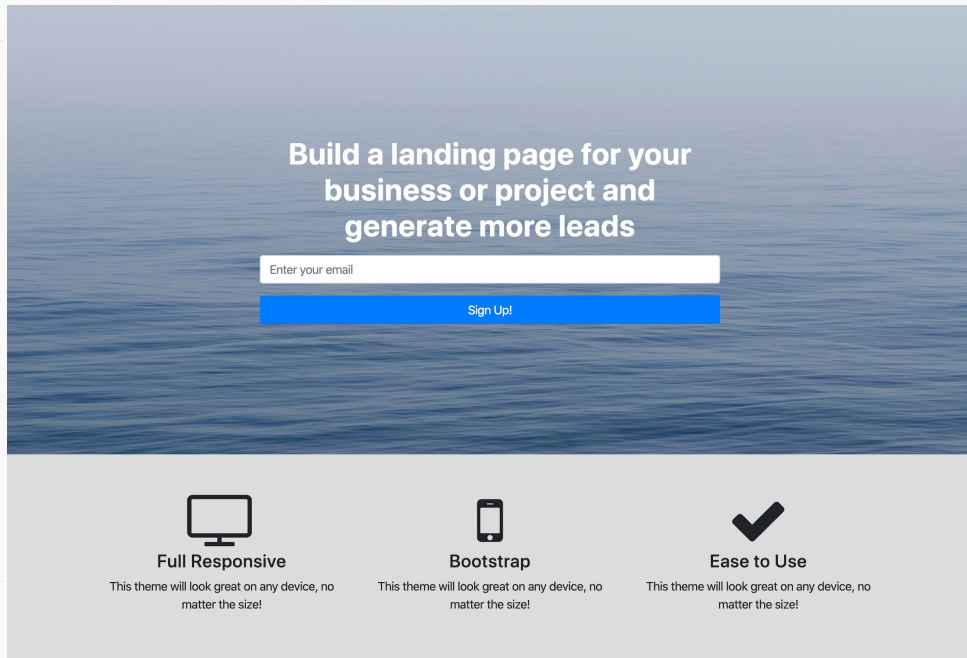

01

- The first exercise is divided into four parts / sections which you can create easily using the bootstrap grid and utilities classes that you've learned the past week.

- Try to use as many bootstrap classes as you can so you don't complicate things.
